

Flush-mounted boxes

Ave offers a complete portfolio of flush-mounted boxes, junction boxes and multifunction junction boxes for all types of walls. The flush-mounted boxes have a wide range of applications and are suitable for both internal and external installation when used with IP55 lids. They are made of high-quality plastic polymers that are resistant to all conditions of use, they are weatherproof and preserve a high degree of elasticity over time.

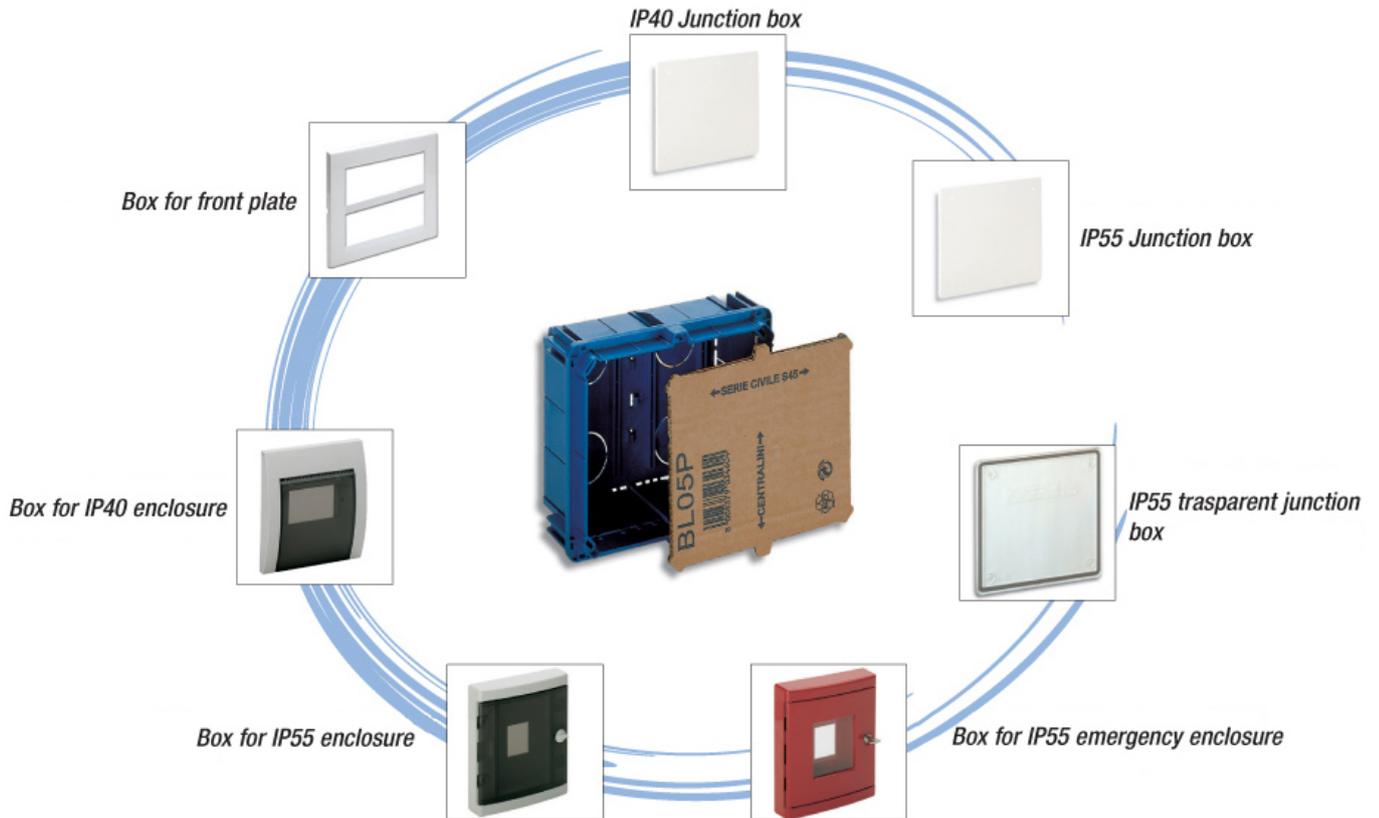

This program covers a range of boxes, starting from the smallest, round boxes Ø60, to large multifunctional boxes used in enclosures, IP40/IP55 enclosures or junction boxes.

Multifunction Boxes for any Solution...

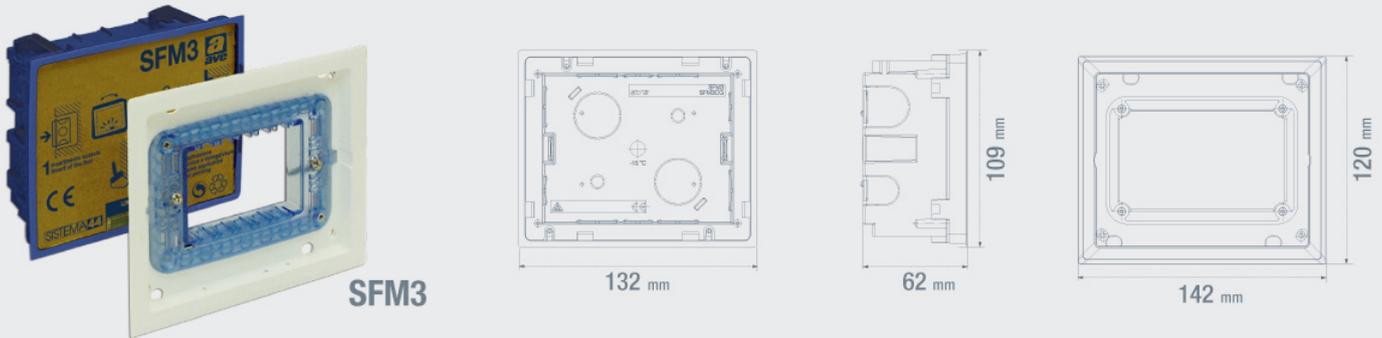

Standard Compliance:
CEI 23-48 (IEC 670)
CEI 64-100/1

SPECIAL BOXES FOR THE INSTALLATION OF WALL-LINED AVE TOUCH FRONT PLATES

Ave's patents in this area are the SFM3 and SFM3/HP boxes, dedicated to the Ave Touch product series, enabling the installation of Ave Touch wall-lined switches, dimmers and push-buttons.

Installation box SFM3 for brickwork walls

The procedure for the installation

Make the hole and use the supplied level to fix the box

Apply the mortar (do not install the inner frame)

Put the finishing touches (do not install the inner frame)

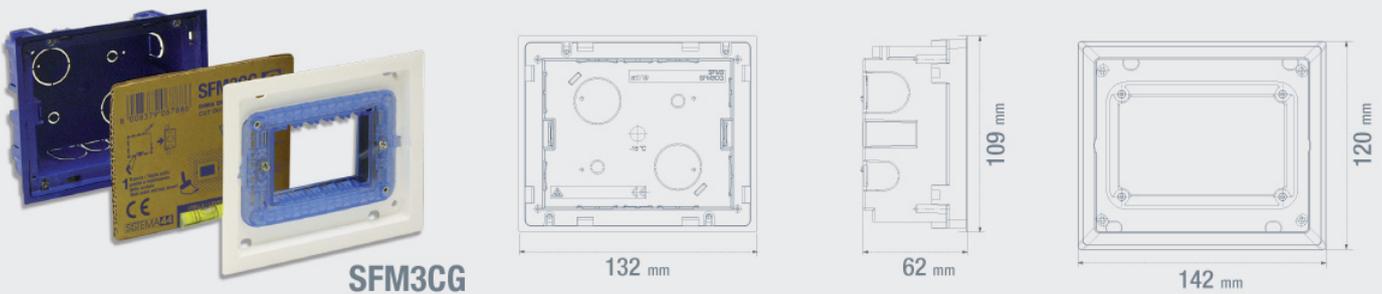

Install the inner frame, and after, paint the wall and the inner frame

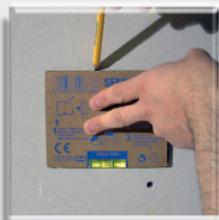

Place the finishing front plate
